

ICHOM Set of Patient-Centered Outcome Measures for COVID-19

Health States: All adults with confirmed or highly suspected SARS-CoV-2 infection

Populations : Adults aged 18 years and above

Stages: Set to follow up on patients until 3 months after infection, which can be extended depending on their recovery.

Treatment Approaches: Primary, Secondary or Tertiary care settings

Excluded Populations: Children and young people under the age of 18

For a complete overview of this Set, including definitions for each measure, time points for collection, and associated risk factors, visit <https://www.ichom.org/portfolio/covid-19/>

Patient Reported Outcome Measures (PROMs)

- 1:** Measured by the PROMIS Global Health 1.2
- 2:** Measured by the PROMIS Short Form v2.0 - Social Isolation 4a
- 3:** Measured by the FLU-PRO

COVID-19

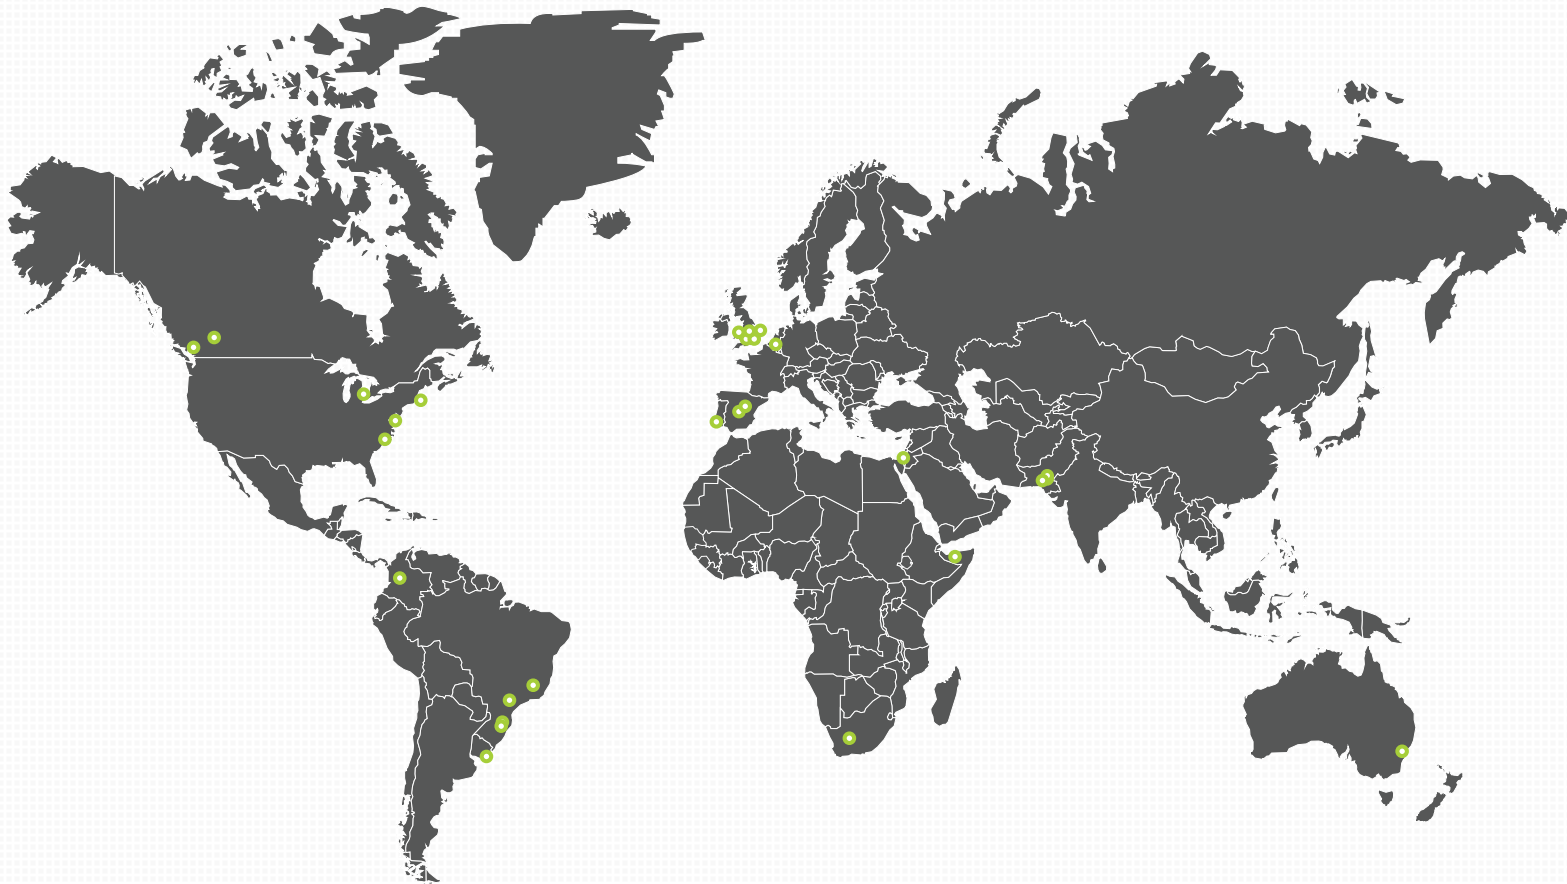

Revised: 24.01.2022
